UTILIZING SKILLED VOLUNTEERS : ARE YOU READY ?

WEDNESDAY, DECEMBER 8, 2010 : 12 Noon - 1 :15 PM

In studying how the Not-for-Profit Sector works, Vantage Point (formerly Volunteer Vancouver) has discovered critical pieces that must be in place before organizations really can begin to engage the "next" volunteer. Skilled and talented volunteers can complement the skill set of paid employees and become a key component in ensuring not-for-profit organizations achieve their outcomes. These volunteers are people who are seeking a time-specific, meaningful role in a community organization. In order for community organizations to incorporate the skill and passion these individuals have to offer, there must first be a huge focus on the employees in these organizations. It truly is about engaging ALL the people differently – and begins with a focus on those we pay with money.
